Professional Summary

Mobile Applications Developer with 3 years of experience in building Android and iOS apps using Flutter.

I have developed several projects in e-commerce, services, note-taking, and real estate — including converting mobile apps into full web versions.

Self-taught, detail-oriented, and passionate about creating clean, scalable, and user-friendly applications with a focus on excellent UI/UX experiences.

Work Experience

Mobile Application Developer (3 years)

- Developed and maintained Flutter applications integrated with Firebase.
- Designed user-friendly and responsive app interfaces.
- Built and connected backend databases using REST APIs.
- Used Provider and GetX for state management and performance optimization.
- Conducted app testing and ensured stability before deployment.

Achievements & Projects

- **2 E-commerce applications**, both converted into responsive websites.
- **Notes application** for managing and saving user notes.
- **Service selling app** connecting service providers with customers.
- **Service selling app** connecting service providers with customers.
- **Cars & Real Estate app** for listing and managing ads efficiently.

Technical Skills

- **Programming:** Flutter, Dart

- **Databases:** Firebase, SQL
- **API Integration:** REST API
- **State Management:** Provider, GetX, Bloc
- **Version Control:** GitHub
- UI/UX Design

Education
