

Bloom Task

A calm task manager designed around category stacks, quick entry and a soft calendar experience.

Project Focus

-  Soft productivity UX
-  Clear priority system
-  Calm calendar experience

A softer way to organize tasks.

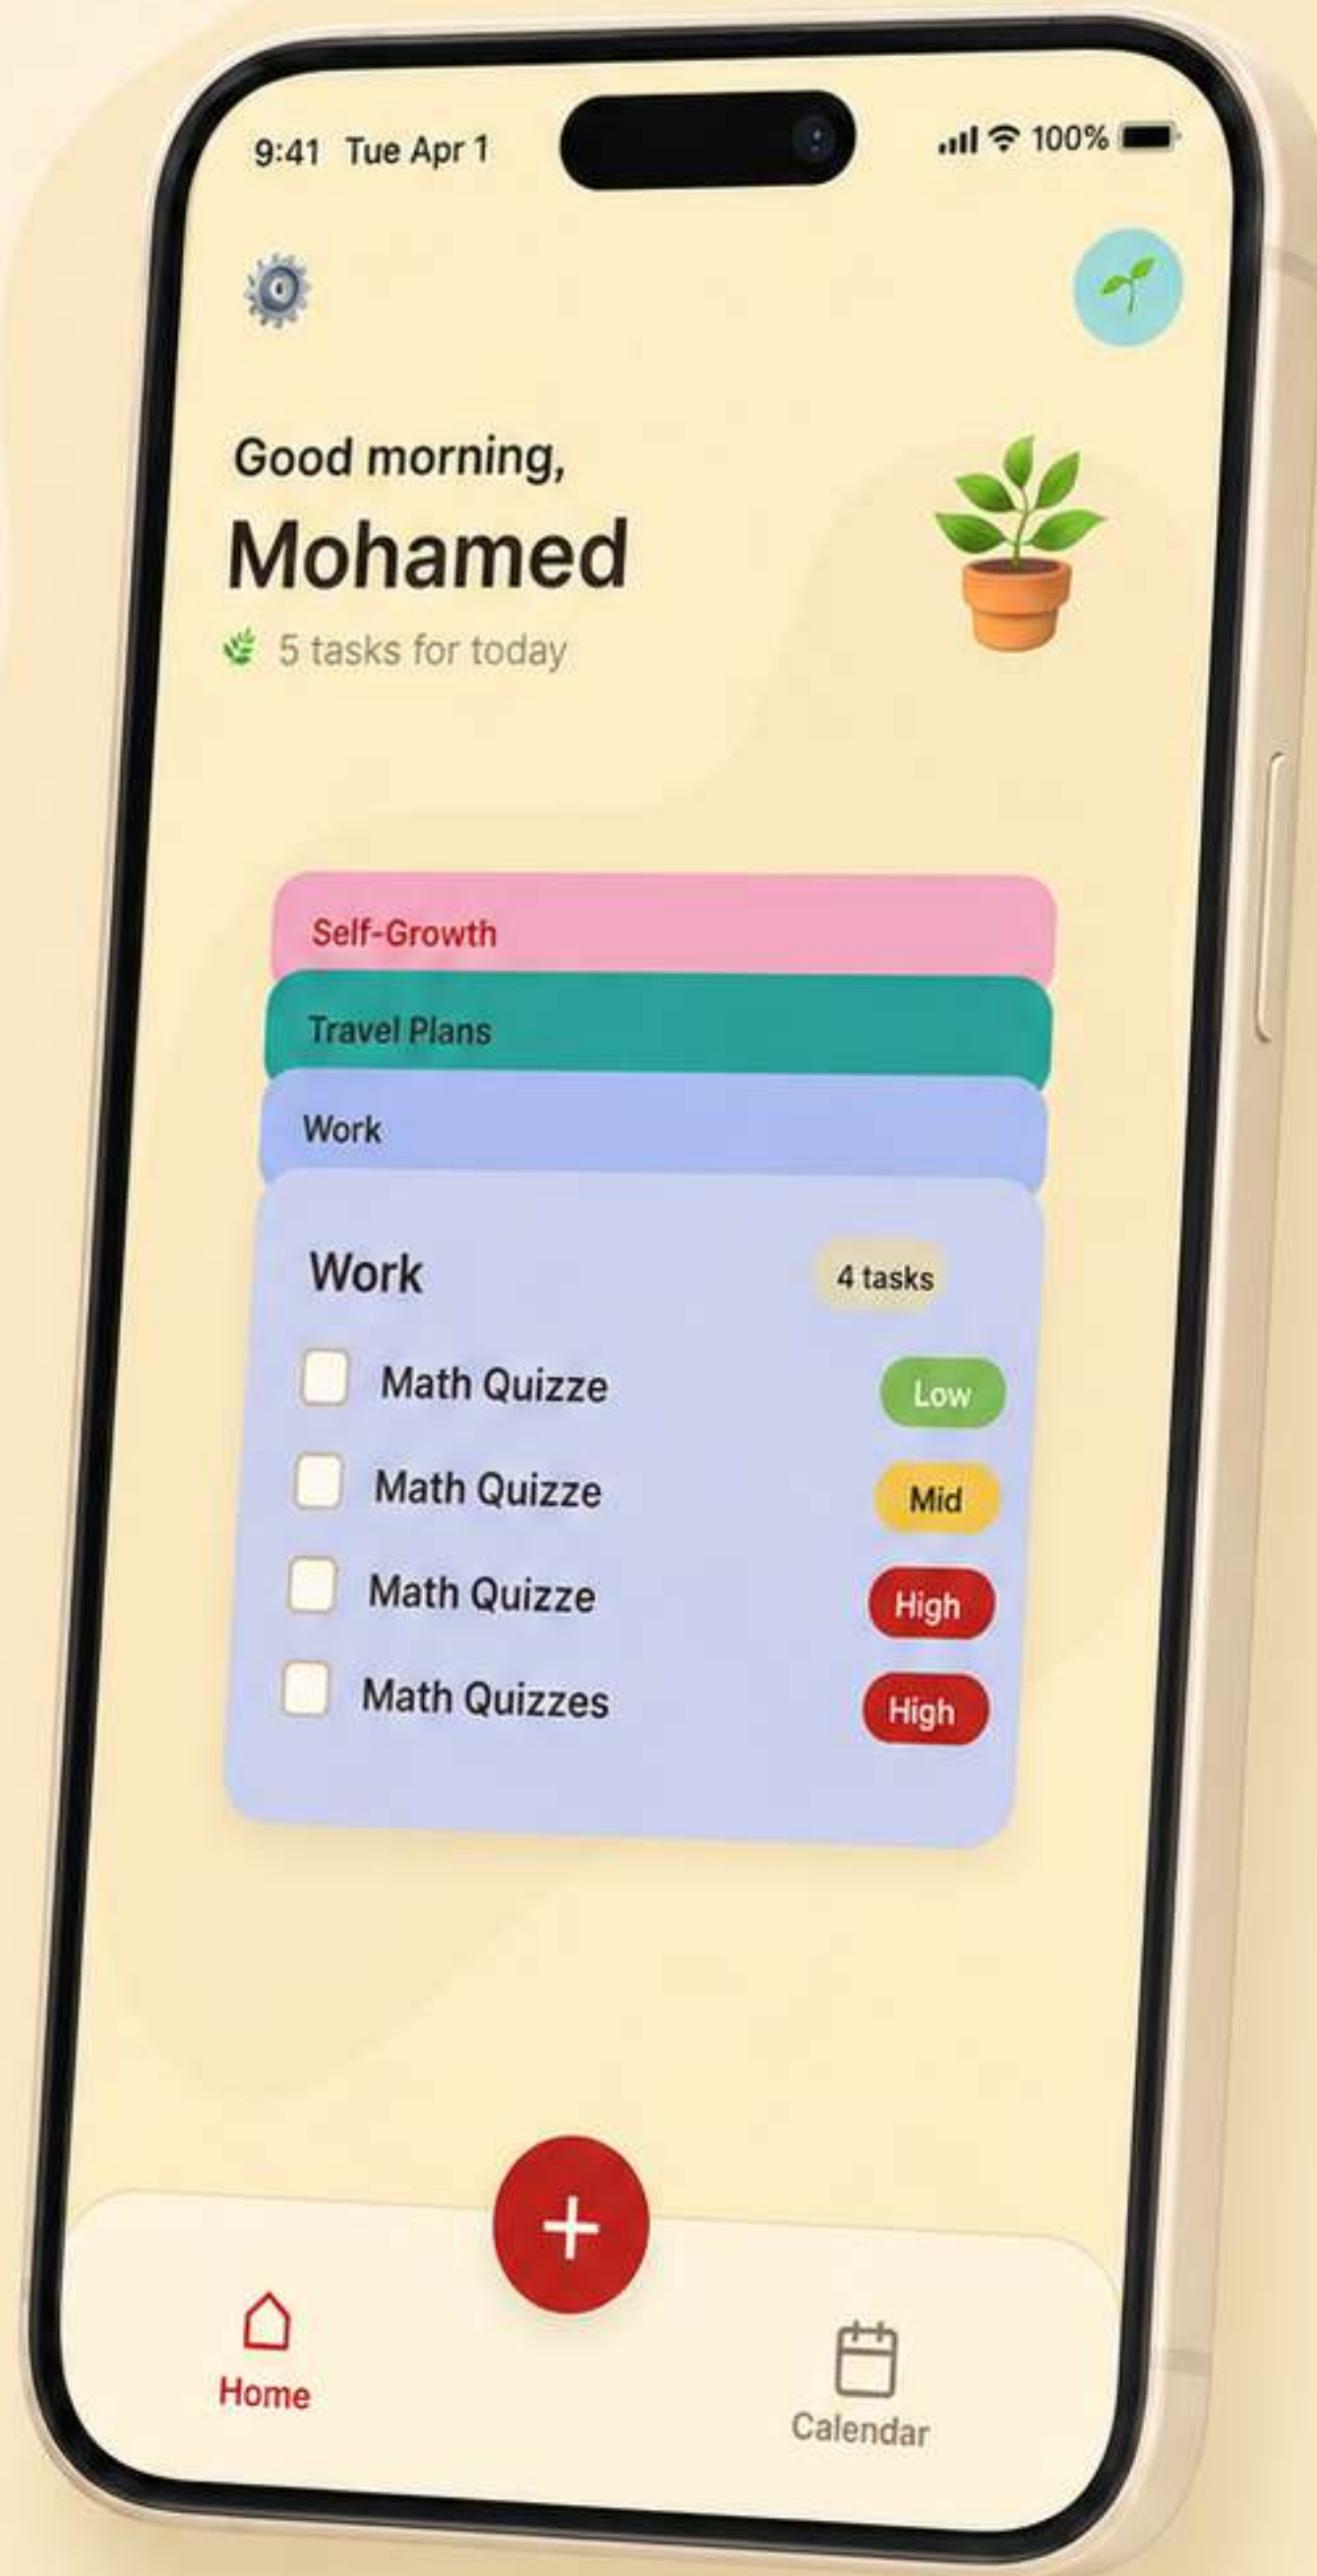

Bloom Task turns task management into a calm daily routine. Users can sort work by category, add tasks in seconds, and scan urgency at a glance.

Design Goals

-  Reduce mental load
-  Make priorities readable
-  Keep the experience warm

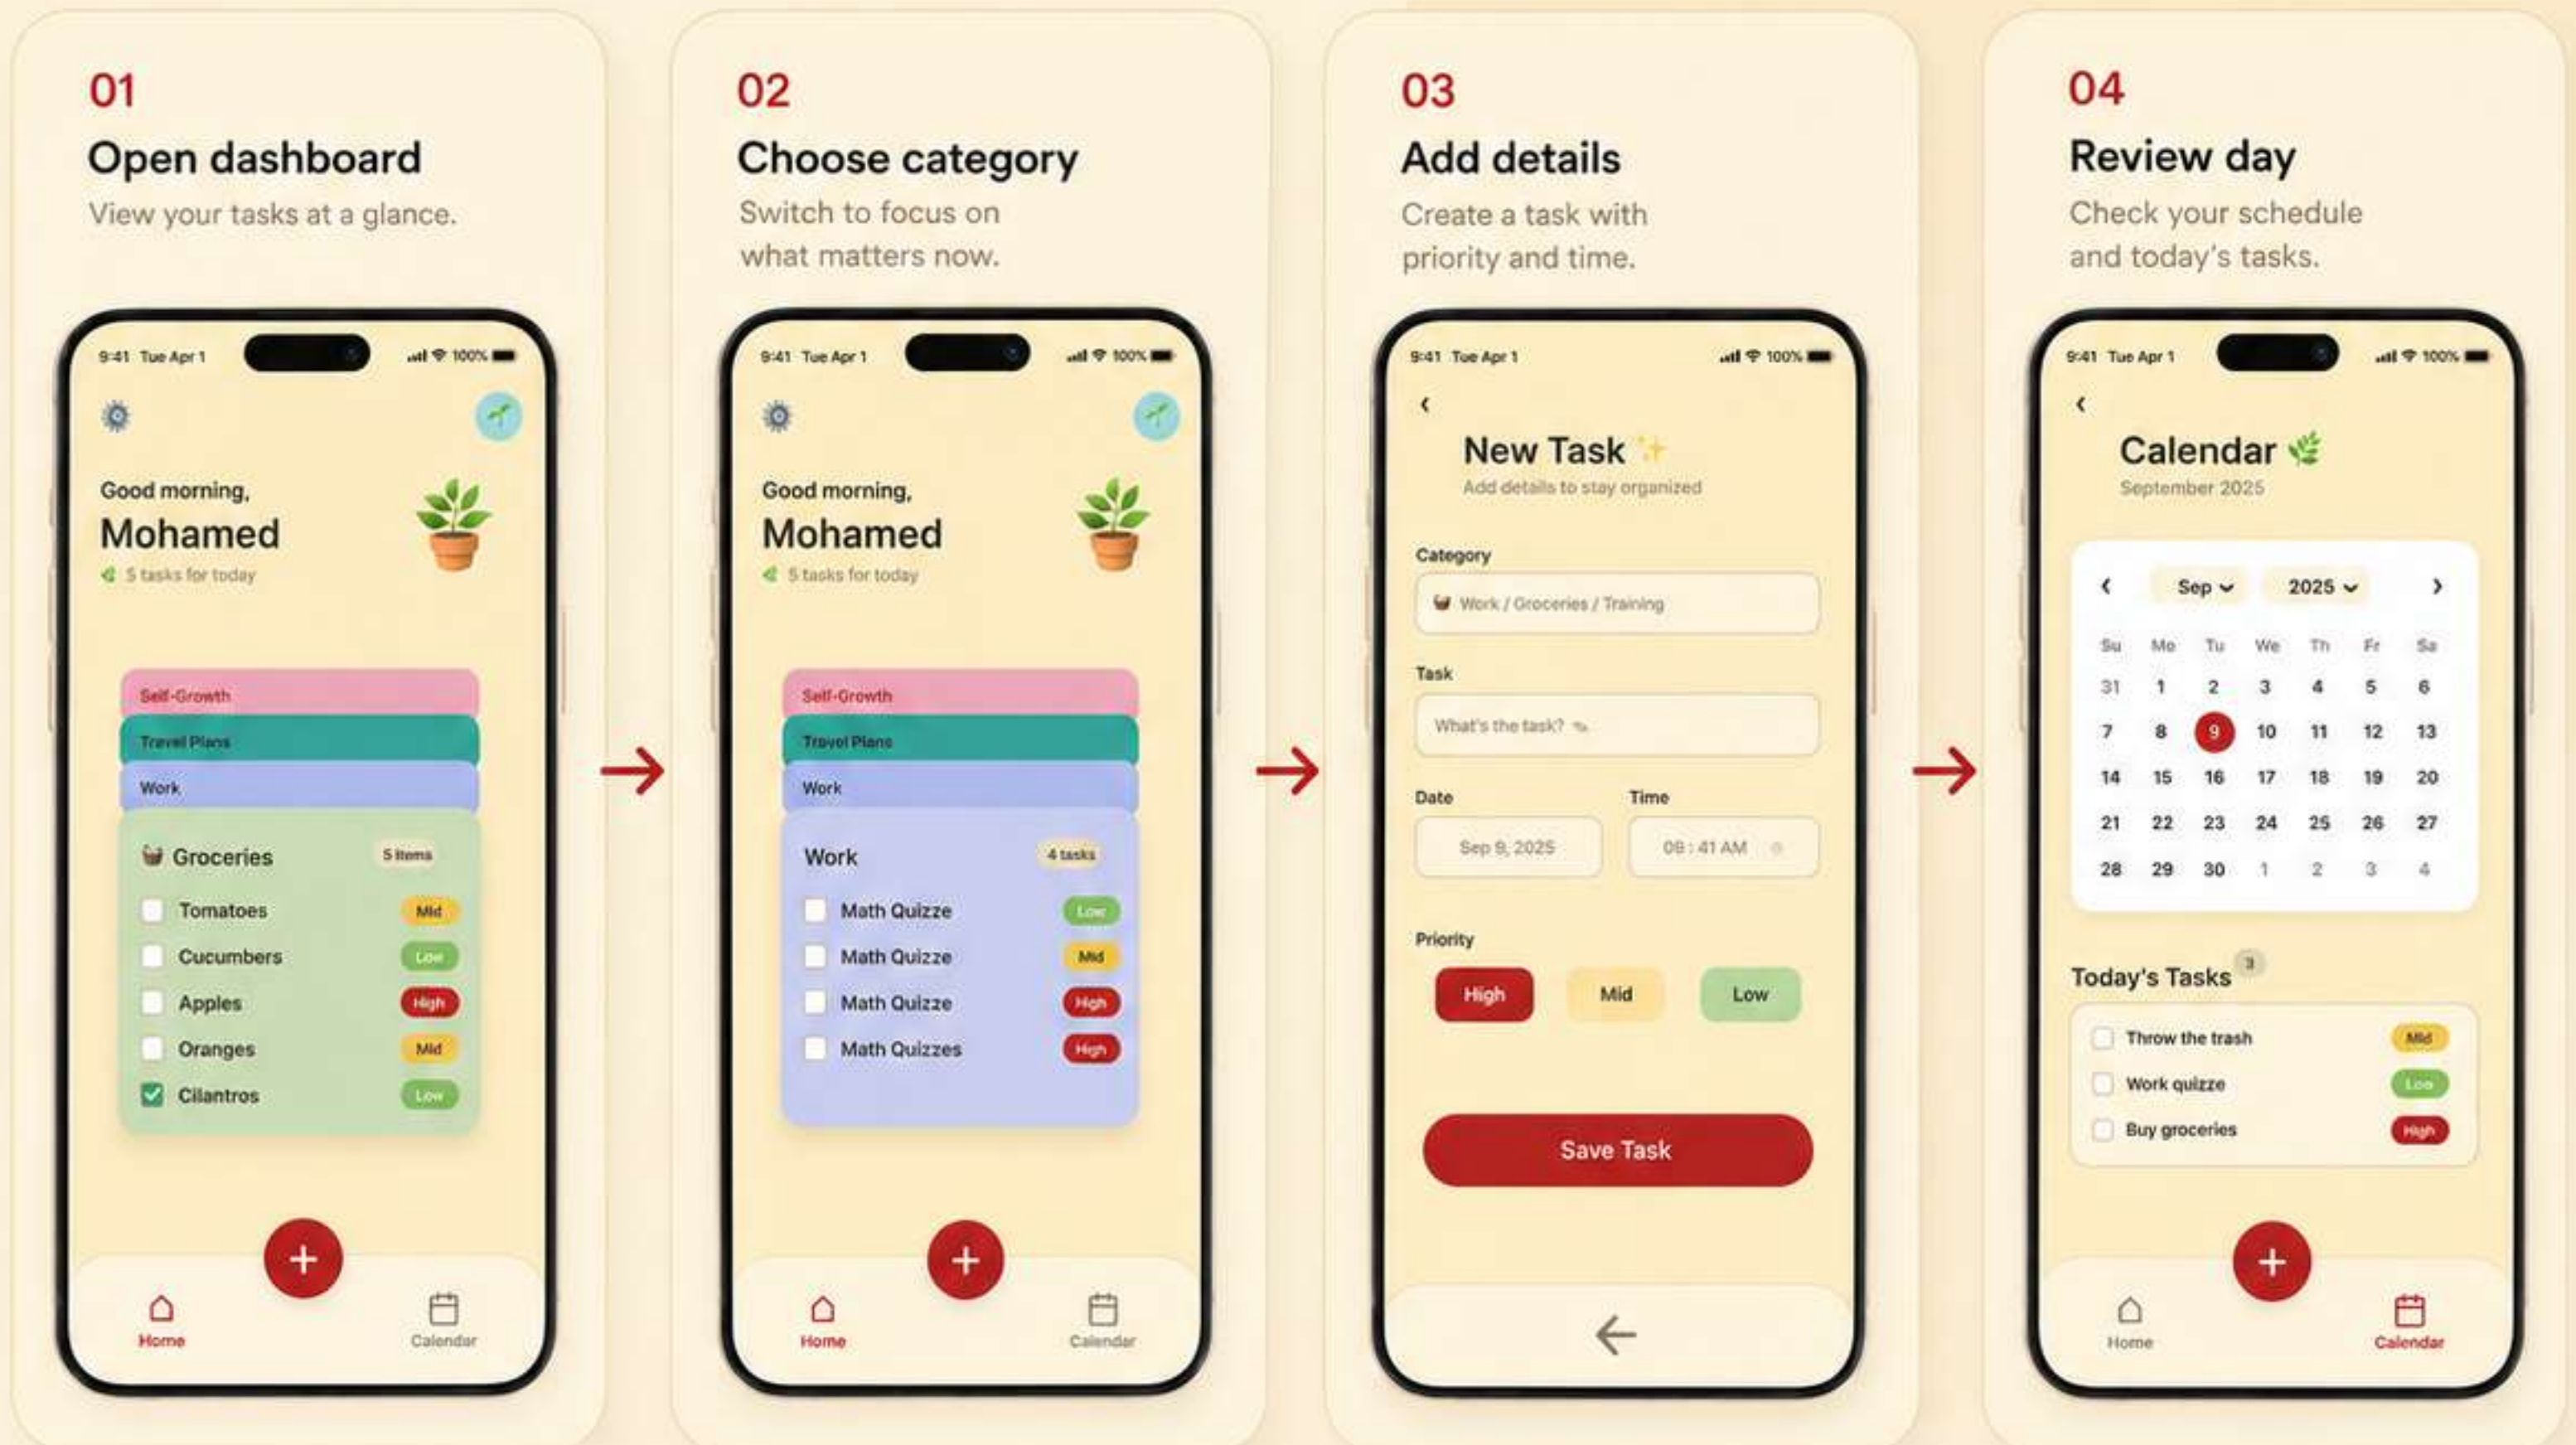

Core Features

-  Category stacks
-  Quick add task
-  Calendar review

From opening the app to completing a task.

The flow is intentionally simple: open the dashboard, switch category, add a task, then review the day in the calendar.

Friendly dashboard stacked by life areas.

The home screen gives the app personality through soft color blocks, a plant motif and a central create action.

01

Stacked categories

Life areas are color-coded and easy to scan.

02

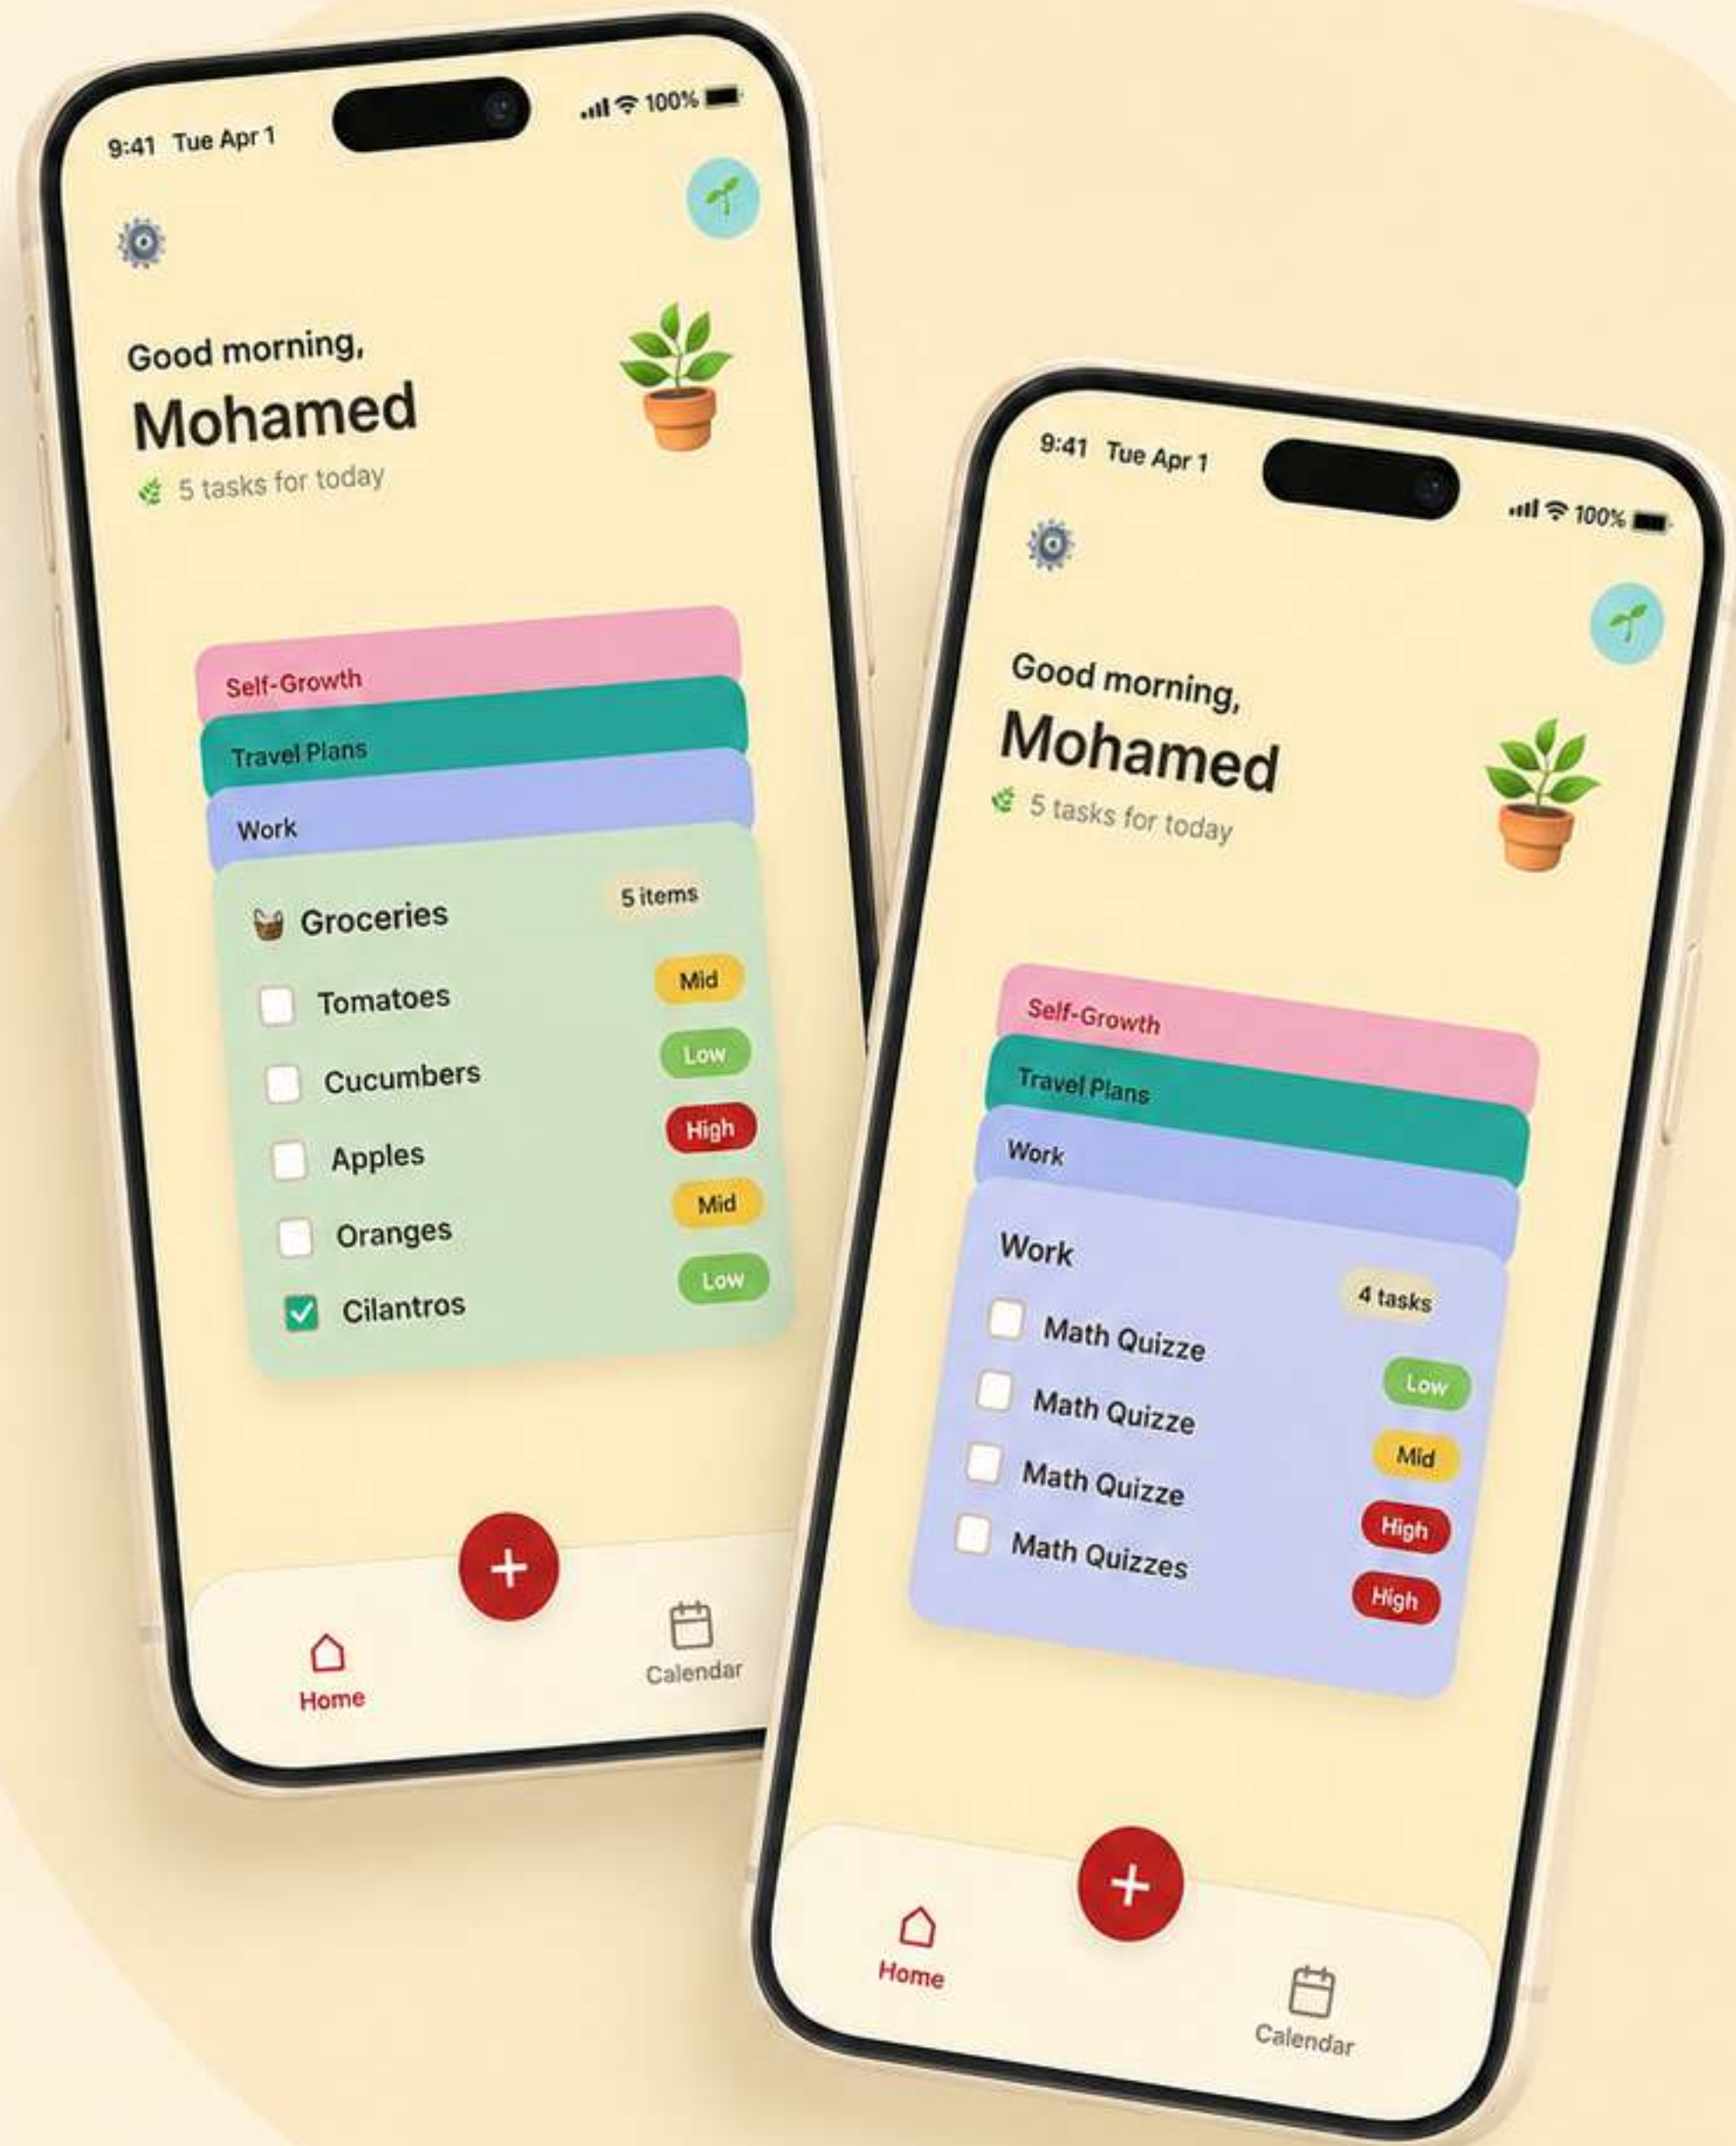

Priority chips

Quickly indicate what needs your focus.

03

Central action

A prominent button makes creating tasks effortless.

A clean form for fast entry.

The new-task form uses large touch targets, quiet borders and three clear priority states. It avoids over-designing the moment where speed matters most.

Category field

Pick a context to keep tasks organized.

Date and time

Set when it matters, without extra friction.

Priority states

High, Mid, Low — clear at a glance.

Calendar view that stays calm.

The calendar screen keeps task review simple, while the selected-day landing gives the app a quiet moment of rest.

01

Selected date

Users can easily pick a date to focus and plan ahead.

02

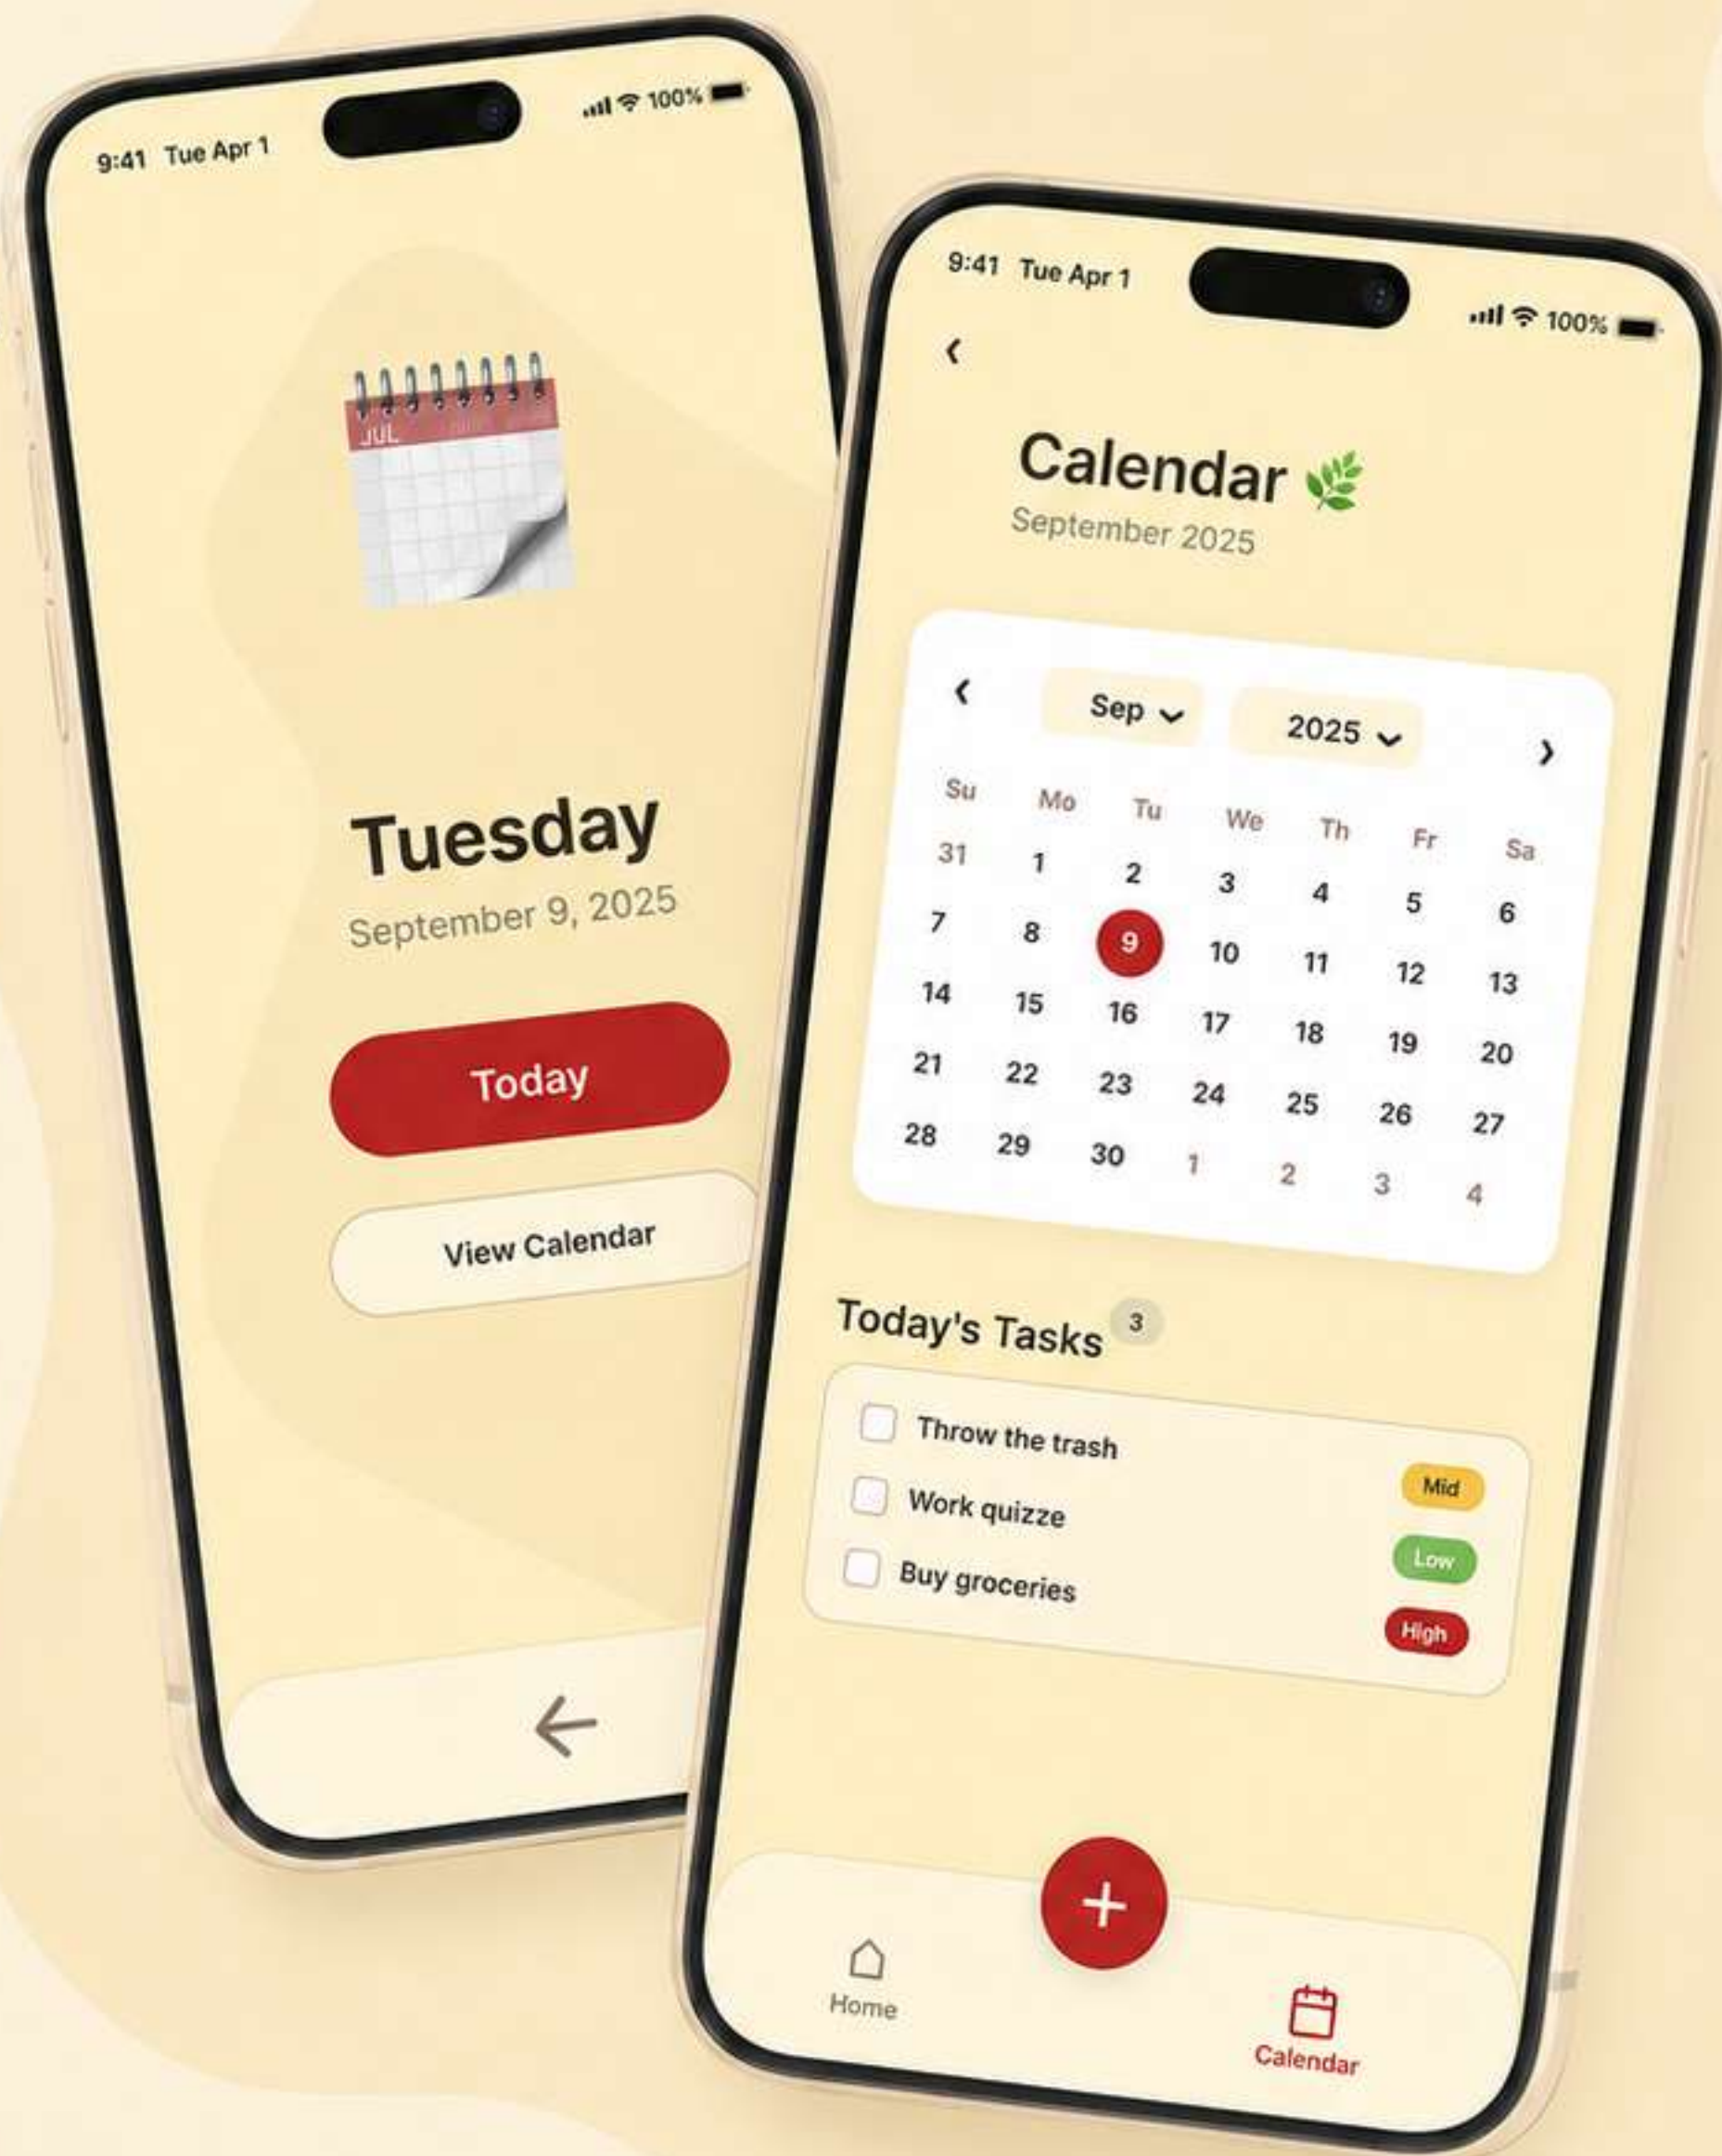

Daily task summary

A quick snapshot of tasks with priority tags for clarity.

03

Empty-day landing

A calm, distraction-free state for rest and reset.

Warm colors, soft cards and readable hierarchy.

The interface balances calm beige surfaces with high-contrast red actions and friendly category colors.

Component language

Priority chips

List item (example)

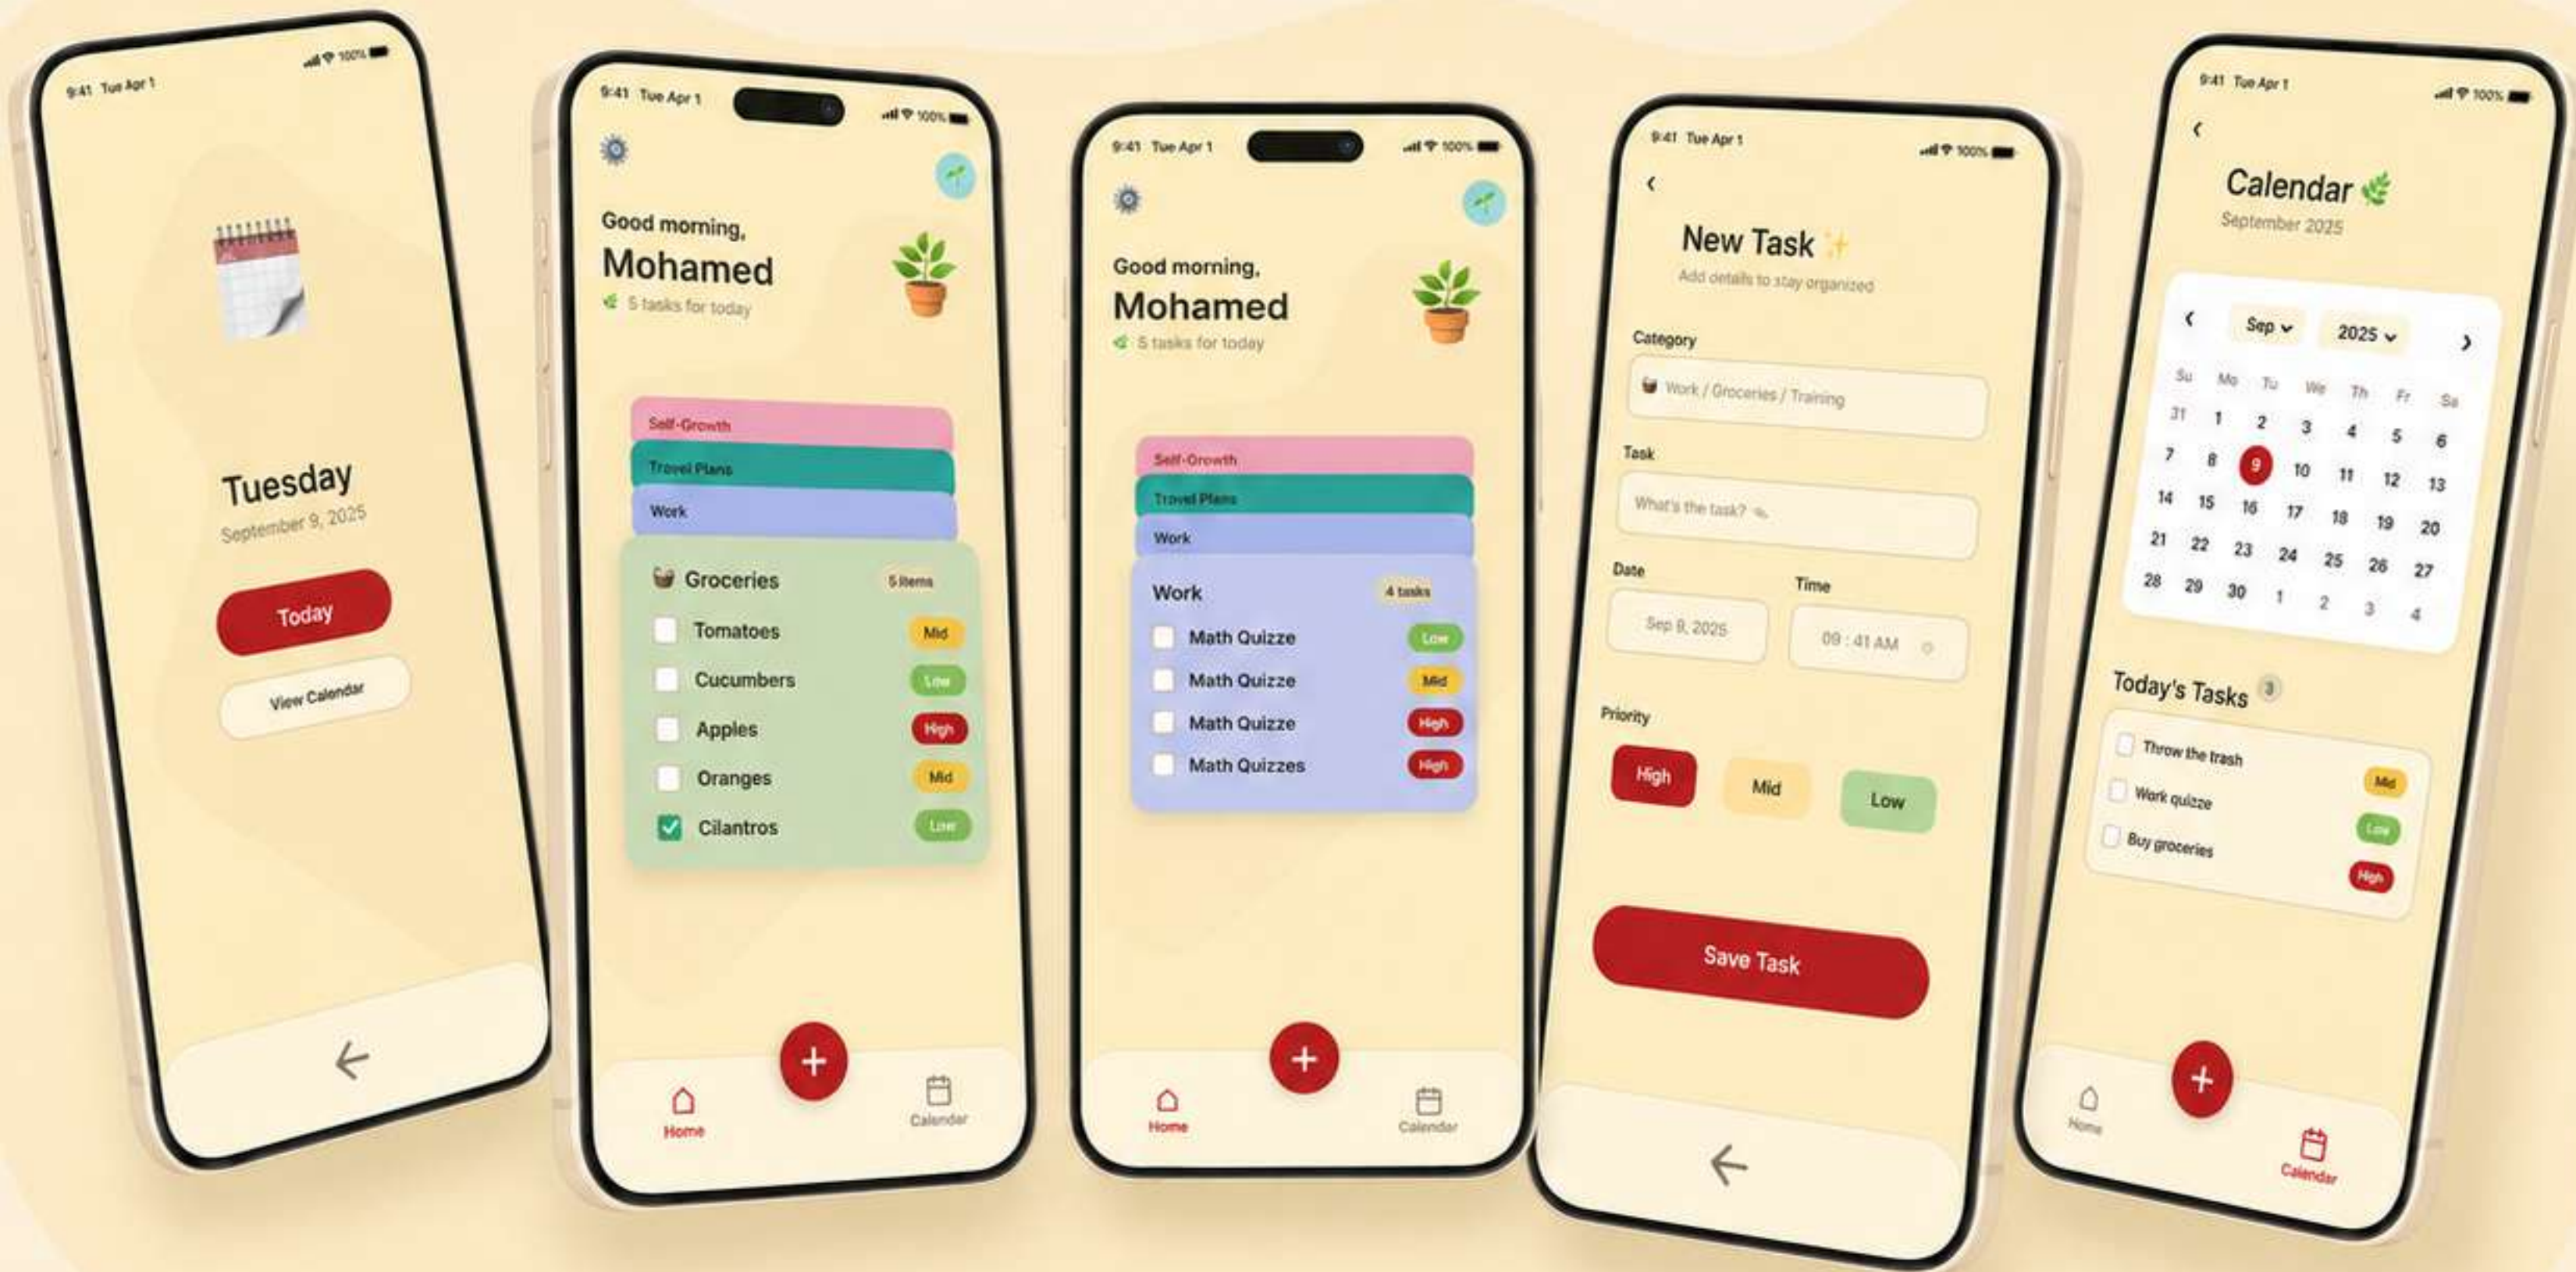

Primary action

Five screens, one clear system.

Each screen uses the same surface language: warm background, rounded containers, soft shapes, red primary actions and clear priority colors.

Built for calmer daily routines.

Bloom Task is a soft productivity product built around fewer decisions, clearer priorities and a friendlier return to the day.

01

Soft but functional

Calming visuals that still get the job done.

02

Fast input

Add tasks in seconds and get back to your flow.

03

Scannable lists

Clear structure and priority colors for quick clarity.

Ready for Behance showcase

Clean, visual and presentation-ready.
