Did you know that only 1% to 5% of buyers leave a review? Even if you hit the best-case scenario—where 5% of your buyers leave a review and every single one is positive—you'd still need 143,240 sales just to match that product. That's a steep climb.

Most shoppers don't realise that many of these reviews aren't native—they just see the numbers and trust them. This is exactly where SalezBooster helps.

We connect your product with real testers who enjoy trying new items and sharing their genuine experiences. Their valuable insights will help you build trust, boost conversions, and compete with top sellers.

Let's bridge the gap—so buyers choose YOU.
